The above map shows the locations of 384 stream sites that will be sampled by volunteers during the VTSSS 2021 decadal survey (an additional 72 sites will be sampled by cooperators as part of the regular quarterly sampling program). The sites are color coded to indicate the Trout Unlimited Chapter to which it has been assigned. The county maps listed below provide more detail on the locations of the survey sites. High-resolution maps and site descriptions will be used to locate the sampling sites during the survey.
